

What do I want to learn or understand better?

Since it hasn't really started yet and we are studying abroad this question is still somewhat unclear. What I do want to understand better is how scrum works. Knowing how to work and adapt as a team dealing with the stress and pressure.

How can I help someone else, or the entire team, to learn something new?

Right now, we are mostly sharing ideas etc hence we are not really helping each other in the way this question seems to be asking. But right now it is important for me and everyone else to be on the same page since communication is key to learning and working together.

What is my contribution towards the team's use of Scrum?

Since this is the first week we have not started with scrum.

What is my contribution towards the team's deliveries?

Not much this far but we have been working on the social contract and discussed ideas for the project.
